SETTING THE RECORD STRAIGHT: President Trump Declassifies
Intel on Foreign Election Interference and Deep State Coverup

The White House

July 17, 2026

Last night, President Donald J. Trump released newly declassified intelligence that had been hidden from the American people for years. The documents reveal that foreign adversaries, led by China, have compromised U.S. voter data on a massive scale and that America's election

- **FACT:** That is exactly the point: Deep State elements within the government withheld important assessments from President Trump. One analyst admitted to “deliberately massaging” the President’s Daily Brief to keep election-related intelligence out, while an FBI official even described running “a shadow government” to prevent this information from reaching the President.

All,

[REDACTED] has heard/received nothing.

We have deliberately massaged our one pending PDB to avoid any direct links to the election. The massive report we have been waiting on has been chopped up into 13 reports that likely will not get out until late next week. Many/all of them will be cross-posted into [REDACTED] or downgraded to [REDACTED] so that can be more readily incorporated into the 45-day piece, if needed.

- **FACT:** This is a deliberate attempt to change the subject. In his remarks, President Trump did not make a claim about past elections; he exposed dangerous, ongoing vulnerabilities in America's election systems that foreign adversaries have both the intent and capability to exploit, and revealed that senior intelligence officials deliberately hid this intelligence from the President and the American people.

CLAIM: "The number of non-citizens on voter rolls is insignificant."

- **FACT:** A Department of Homeland Security review identified approximately 278,000 non-citizens registered to vote in federal elections across just four states that cooperated with the Department's request. Because many Democrat-led states refused to provide their voter files, the actual number is significantly higher.

CLAIM: "There is no evidence of fraud or irregularities in our elections."

- **FACT:** The declassified documents detail how clear evidence of fraud was deliberately buried. In one case, an investigation discovered Democrat-aligned canvassers in Michigan forged voter registrations, submitted applications for nonexistent people, and received gift cards based on the volume of fraudulent registrations they produced in the weeks leading up to the 2020 election. Despite the evidence, the Biden Justice Department slow-walked the investigation for years.

CLAIM: "Mail-in voting is safe and secure."
